Knee & Hip Rehabilitation Device

IMPROVE MOBILITY

EZMEND was developed as a “take home” version of what many hospitals and medical clinics have been using for years. **EZMEND** is engineered to accelerate healing by:

- Increasing range of motion in knee, hip and ankle joints
- Increasing mobility and muscle tone
- Improving circulation
- Diminishing post-operative pain
- Preventing muscle weakness (atrophy)
- Reducing swelling
- Minimizing stiffness
- Minimizing scar tissue developing at joints
- Minimizing heel chafing

Hip Exercise

Place EZMend perpendicular to leg and gently slide foot back and forth

INCREASE STRENGTH

EZMEND can help restore muscle tone, reduce muscle wastage (atrophy) and increase range of motion. A great solution for those who are bedbound by physical impairments or would like to become more active and flexible.

Knee & Hip Exercise

Place EZMend in line with leg and gently bend and straighten knee

ACCELERATE HEALING

EZMEND is easy to use, does not require you to put weight on your injury and keeps joints perfectly aligned for optimum results

- Easy to Use
- Safe for All Ages
- One Size Fits All
